

**Riolito - The Answer for Universal Design,
The Solution for Challenging Installations**

- ADA-Compliant Flush Shower Floor System (Curbs Available)
- Installs Easily, Drains Flawlessly with no lip or shower delineation
- Certified Compliant with ISO/IEC 17025 in Independent Testing
- Certified Compliant with IAPMO UPC and IPC Codes
- Created as Ready-to-Install, Yet Customizable System

wedi's Riolito is revolutionizing shower construction in America. This innovative product, previously only available in Europe, is now providing ADA-compliant solutions for private residential baths, multi-family housing, even commercial facilities—anywhere generational users need flush flooring for enhanced mobility.

Three Drain Cover Options: Standard, Deluxe, Tile-Ready

The wedi pan and drain blend with tile for leak-free, flawlessly flush shower floors.

wedi also offers curbs that may be used with the system as well.

Getting Started with Riolito - You Won't Get Stalled in Installation with Helpful Instructions

wedi has a full array of helpful materials to help ensure installation success from the first Riolito project. From a complete, easy-to-follow written installation guide to handy diagrams and show-me-how videos on YouTube, wedi provides everything installers need for success and home and facility owners need for peace of mind.

The great news is the system is fabricated for seamless, leak-proof functionality. When installed properly, the Riolito performs reliably for worry-free, transitionless showers.

The team at wedi understands the high importance of installation training and guidance. In addition to the range of materials available, wedi is able to offer technical assistance to whatever level is needed. Please contact your wedi sales representative to discuss alternatives for ensuring installers are ready for the Riolito and all wedi product lines.

What Do You Know About Universal Design?

Universal design addresses the need for interior configurations and material specifications that are friendly to the ranging requirements of a varied population.

Elderly people and people with disabilities have unique needs that must be considered when homes, hotels or public facilities are designed. Those who use universal design are simply anticipating those needs in advance, rather than making reactionary fixes post-construction or remodeling.

As our population ages and people live longer, universal design specifications are sure to become more prevalent. Forward-thinking designers, homeowners and facility managers will want to go "universal" from the get-go.

wedi's innovative products are essential to truly effective universal design for baths.
