

Dear wedi Customer,

For more than 27 years, wedi has offered the most versatile, waterproof and durable building panel in the tile setting industry. Thanks to this exceptional product, we've been 100% waterproof for nearly three decades.

Of course, so much more goes into a great shower or wet-area tile installation. We built upon the foundation of our 1/2" building panel to create an expansive high-performing line of innovative shower solutions. We offer 1 1/2" and 2" thick building panels which can create curved, exotic installations or even free-standing shower applications, all structurally sound, waterproof and tile-ready.

We've got you and your tile installation covered when it comes to unique installation alternatives. And our products perform so reliably, you are well assured wedi works as hard as you do to create showers and tile-ready wet areas that are true oases for homeowners. Want more details? Visit us online at wedicorp.com or join in the discussion on Facebook.

Sincerely,

BASTIAN LOHMANN
Director of Sales, wedi Corporation/
wedi Americas

 **wedi**[®] has the solutions to accessorize
& customize every shower!

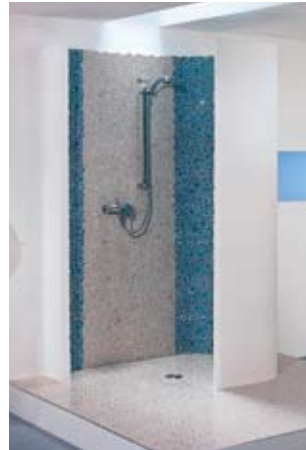

Don't just tile a shower, create an experience. wedi's complete line of shower accessories has everything you need to fully surround showers, as well as baths and steam rooms, with high end, creative tile installations that are waterproof and of top quality.

Every component is specially designed and manufactured to meet the demands of challenging installations.

wedi® Building Panels in Showers and Wet Areas

The wedi 1/2" building panel is internally waterproof and won't wick water like laminated, multiple layer building panels do. No matter if used with the wedi Fundo shower base or installed into a mud-bed application, you can count on the wedi building panel in any wet area application.

Innovative Shower Solutions for Today's Market

Available from wedi for more than 27 years.

To create even more attractive showers or wet areas, wedi® offers an array of accessories with exceptional design.

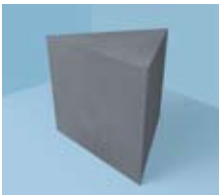

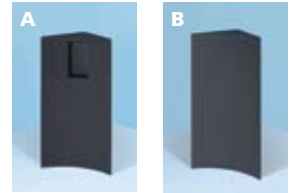

Niches:

16x16 and 16x22, benefits include adjustable shelf, easy insertion into backerboard assembly with flush transition; produced in USA by wedi, unmatched pricing in the market

Corner Niches A & B:

Excellent for creating round corners for wall and ceiling, as well as for making seats possible in even the smallest showers; trims to height as needed; A & B may be combined as needed

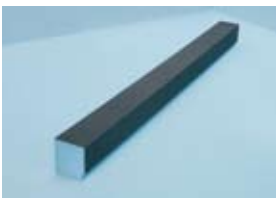

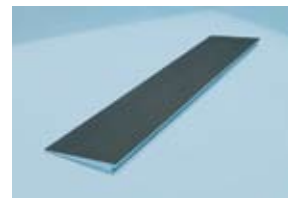

NEW! Full Foam Triangular Seat:

100% waterproof foam (versus water-absorbing, sponge-like white EPS foam), mesh and resin coated, easily trimmed to size and height

Ramp:

Ideal for ADA compliance, eliminates need to use dry pack, no curing times

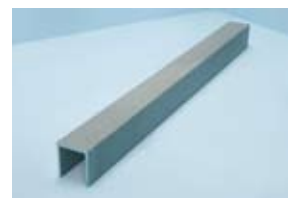

Full Foam Curb:

Pre-pitched and capable of holding 480 lbs/ft

Curb Over:

For use in installations over 2x4 curbs, square corners, reinforced inside and outside, so strong you can stand on them

Suspended Seats:

Installs quickly into existing wall studs, no additional blocking, no dry pack filling and no curing times

wedi 2" Building Panel:

The versatile solution for custom-designed washstands, tub surrounds, seats/benches, shelves and countertops; structurally sound to eliminate the need for 2x4 or plywood substructure, 100% waterproof and tile ready; will not peel or disintegrate (unlike foam panels with paper components or lamination and fleece exposed to water); the trusted solution for more than 27 years
